

Carson Yee

Résumé

Stanford, CA | 559-321-4815 | carsony@stanford.edu | [LinkedIn](#) | [Website](#)

Education

Stanford University

BS in Electrical Engineering, Hardware/Software Systems Concentration

Stanford, CA

Expected Graduation: June 2029

Clovis Community College | 4.00 GPA

Summa Cum Laude, A.S. in Electrical Engineering and Business Administration

Fresno, CA

August 2024 - May 2026

Technical Skills

Languages & Software: C++, Multisim, TinkerCAD, AutoCAD, SolidWorks, ArcGIS Pro, Arduino IDE, Excel

Hardware & Systems: DMM, Oscilloscope, Function Generator, microcontrollers, circuit wiring, bench PSU, soldering

Engineering Experience

Engineering Intern/Risk Analyst

Akel Engineering Group, Inc.

Fresno, CA

August 2025 - August 2026

- Evaluated business risk for municipal water systems using ArcGIS Pro, Excel, and AI-assisted Python scripts
- Developed multi-million dollar renewal and replacement plans to secure and deploy infrastructure investment
- Authored a specialized curriculum to train engineers and interns in data analysis and risk assessment

Manipulators Sub-Team, MATE ROV Competition Explorer Class

Engineering Renaissance Club

Fresno, CA

November 2025 - June 2026

- Designed a linear-actuated manipulator using lead screws, flexible couplers, and bearings to mitigate side-loading
- Developed a passive deployment canister with a magnetic breakaway head to spool and release payloads
- Engineered gear-driven four-bar linkage grippers in SolidWorks w/ toleranced geometries for 3D printing
- Conducted trade studies using weighted decision matrices to evaluate motor and mounting system trade-offs

Electromechanical Design Project, "Trick or Treat"

Engineering Renaissance Club

Fresno, CA

September 2025 - November 2025

- Directed a six-person team through the complete design lifecycle of an interactive electromechanical device
- Co-authored the project technical report and collaborated to establish the electrical Bill of Materials
- Wired an Arduino Uno, actuators, and an L298N dual H-bridge motor driver for bi-directional DC motor control
- Assisted with C++ coding in the Arduino IDE to control randomized hardware actuation and component timing

Assistant Auto Mechanic

Contreras Smog & Auto Repair

Fresno, CA

September 2022 - September 2024

- Utilized OBD-II software and continuity testers to diagnose blown fuses and replace sensors and wiring harnesses
- Replaced fluids, spark plugs, and mechanical components, conducting QA checks to verify system integrity

Leadership Experience

President & Chartering Officer

Phi Theta Kappa Honors Society | Beta Psi Psi Chapter

Fresno, CA

October 2024 - May 2026

- Co-founded and scaled the chapter to 375+ members while establishing systems for long-term continuity
- Secured \$10,000+ in funding to subsidize conference travel and pioneer a new member engagement system
- Led transfer and professional development workshops while overseeing campus and community initiatives

Interests: Martial arts, skiing/snowboarding, hiking, backpacking, fishing, guitar, saxophone, missions volunteer work
